

SPF1: Smoking, vaping and money

The most commonly bought brands of cigarettes in the UK, in 2023, cost £10.25 per pack of 20 (the price of cigarettes increases yearly, so before calculating, check if the cost is still the same today)

1. Calculate the cost of smoking per day for someone smoking:	
a) 5 cigarettes per day	
b) 10 cigarettes per day	
c) 20 cigarettes per day	
2. Calculate the cost of smoking per week for someone smoking:	
a) 5 cigarettes per day	
b) 10 cigarettes per day	
c) 20 cigarettes per day	
3. Calculate the cost of smoking per month (assuming 31 days in a month) for someone smoking:	
a) 5 cigarettes per day	
b) 10 cigarettes per day	
c) 20 cigarettes per day	
4. Calculate the cost of smoking per year for someone smoking:	
a) 5 cigarettes per day	
b) 10 cigarettes per day	
c) 20 cigarettes per day	

Bonus question:

5. If someone smokes 20 cigarettes per day, from age 18 until they are 65, at today's prices, how much will they have spent on smoking over their lifetime?
An illustration showing several stacks of banknotes in various colors (pink, blue, green) and several gold coins.

The most popular brands of disposable vapes in the UK, in 2023, cost (on average) £5.00 each (prices vary depending on the supplier, number of puffs per devise and the brand, so before calculating, research the current average cost)

1. Calculate the cost of vaping per day :	
a) 1 vape every week	
b) 1 vape every 2 days	
c) 1 vape every day	
2. Calculate the cost of vaping per week :	
a) 1 vape every week	
d) 1 vape every 2 days	
e) 1 vape every day	
3. Calculate the cost of vaping per month (assuming 31 days in a month):	
a) 1 vape every week	
d) 1 vape every 2 days	
e) 1 vape every day	
4. Calculate the cost of vaping per year :	
a) 1 vape every week	
d) 1 vape every 2 days	
e) 1 vape every day	

Bonus question:

5. If someone uses 1 vape every day, from age 18 until they are 65, at today's prices, how much will they have spent on vaping over their lifetime?
